

MPVI4

ALL-IN-ONE TUNING & DIAGNOSTICS

Introducing MPVI4, the latest evolution of HP Tuners' industry-leading OBDII interface. Built for professionals and enthusiasts alike, MPVI4 connects your vehicle to VCM Suite software (5.2+) for faster, smarter, and more powerful tuning and diagnostics than ever before.

KEY FEATURES & ENHANCEMENTS

IMPROVED STANDALONE LOGGING

Our most powerful device yet, capable of delivering standalone logging performance on par with VCM Scanner and a wired connection.

UPGRADED HARDWARE ARCHITECTURE

New internal processor for improved data throughput and flashing performance; 30x more memory than previous generation MPVI3.

HIGH-SPEED USB-C CONNECTIVITY

Faster, more reliable communication with your PC and vehicle.

BLUETOOTH® 5.2

Seamless wireless connection for scanning, logging, and TDN support.

WI-FI READY (FUTURE UPDATE)

Wireless VCM Suite connectivity coming soon.

ENHANCED STORAGE & EFFICIENCY

increased onboard memory for robust logging sessions.

IMPROVED OBDII FITMENT

A revised, tapered design means a more secure connection and better compatibility with even more makes/models.

BUILT-IN PRO FEATURE SET

Standard on every MPVI4, enabling standalone data logging and external sensor integration with PROLINK+.

RGB STATUS LEDS

Clear visual indicators for power, connection, and activity status.

CROSS-PLATFORM COMPATIBILITY

Works with VCM Suite (5.2+), TrackAddict, and RaceRender.

BUILT FOR PROFESSIONALS AND ENTHUSIASTS

MPVI4 is the ultimate device for tuning, diagnostics, and data logging across thousands of supported vehicles from over 40+ manufacturers—whether you're in the shop, at the track, or in your own garage.

Tune all the toys in your garage with one device.

- Read, edit, and write supported vehicle calibrations directly through the OBDII port.
- Diagnose and monitor performance data with VCM Scanner.
- Customize your workflow with scalable HP Tuners Credits—license one vehicle or expand to entire model years.
- Ideal for shops, dealers, and WDs offering custom tuning and support services.

NOW COMPATIBLE WITH VCM SUITE 5.2

MPVI4 requires VCM Suite 5.2+, launching alongside the device.

Version 5.2 introduces enhanced stability, faster flash times, and improved integration for connected tuning workflows.
