

VCM

SCANNER

VEHICLE DIAGNOSTICS MADE SIMPLE.

Make diagnostics simple and calibrating efficient with VCM Scanner and your HP Tuners interface. Accessing diagnostic data is a critical part of making any vehicle more efficient and powerful while also maintaining its emission control systems. From scanning DTCs to high-speed data logging and diving deep into your vehicle's performance data with VCM Scanner, we offer the most comprehensive and cost-effective scan and diagnostic package in the industry. Plus, VCM Scanner does not require vehicle licenses for scanning, logging, or viewing diagnostic data, giving you more freedom and flexibility.

THE POWER OF VEHICLE DIAGNOSTICS

Whether you're tuning for high performance, fuel economy, fleet tuning, or anything in between, you need diagnostic data. The power of diagnostics can reveal hidden performance, mechanical issues, and emissions improvements before jumping into VCM Editor to build your custom calibration. Get the most in-depth look at your vehicle's health and performance in VCM Scanner so you can optimize your time and your calibrations.

ALL EYES ON YOUR DATA.

SCAN FOR DIAGNOSTIC TROUBLE CODES (DTCs)

From exhaust and vacuum leaks to misfires, VCM Scanner can scan and read powertrain DTCs when that check engine light pops up on your dash. Scan, log, and chart all your data with customizable charts, graphs, gauges, and tables to find the root cause and officially diagnose the issue.

MANAGE VEHICLE CONTROLS

Unlike the average scan tools at your local auto part stores, MPVI3 and the power of VCM Scanner can control functions like open and closed loop, fans, gear select, timing, and air-fuel ratio—without flashing your control module.

UTILIZE SPECIAL FUNCTIONS¹

Take advantage of special functions like throttle relearn and transmission cleaning (for select GM transmissions) and view/reset various engine and transmission adaptives so you can build the most accurate calibration.¹ Use other special features like Gear/Tire Wizard, allowing you to recalibrate your speedometer after installing bigger tires and/or adjusting gear ratios.

¹Disclaimer: These functions are only available for select supported vehicles.

EXPERIENCE HIGH-SPEED, STANDALONE DATA LOGGING

Experience high-speed, standalone data logging on the dyno, track, or street with VCM Scanner and MPVI 3, now standard with Pro Feature Set—removing your laptop from the equation. Speed up the process

even further with access to exclusive broadcast parameters (available for most supported vehicles) Have eyes on all your vehicle data in real-time and document every log in the process.

DIAGNOSTICS FOR EMISSIONS COMPLIANCE

¹Disclaimer: These functions are only available for select supported vehicles. View emissions critical diagnostic data in VCM Scanner from your O2 sensors, PCV system,

EGR system, catalytic converter, misfires, fuel imbalances (Rich/Lead Threshold), and mass air flow meter to keep your vehicle running efficiently and emissions compliant.
