

CUSTOM DIESEL TUNING BY HP TUNERS CUMMINS | POWER STROKE | DURAMAX

Your diesel deserves the best. Achieve more dependable towing power and improved fuel economy for your supported diesel vehicles using HP Tuners. From light - duty “work hard, play hard” trucks to medium - duty trucks for your business, use our diagnostics and tuning tools for every supported diesel you own.

THE RIGHT TOOLS FOR THE JOB

It all starts with our MPVI3 interface and VCM Suite diagnostics and tuning software. Data log your diesel's performance and view advanced diagnostics data in our VCM Scanner software. Then, use that data to build a better, customized tune for your vehicle in our tuning software, VCM Editor, with access to hundreds of engine and transmission parameters.

- Build a custom tune based on your diesel vehicle's setup and application
- Adjust transmission tune for crisp gear shifts and power delivery
- Access to Bidirectional controls like TPMS and tire size (varies per platform)
- Tune your powersports and personal watercraft toys too!
- Ditch the dead pedal and increase throttle response
- Adjust speedo for bigger wheels and tires with Gear/Tire Wizard (varies per platform)
- Switch tunes using the steering wheel controls or Diesel Switch.

MEDIUM-DUTY DIESEL SUPPORT

When your truck is what helps pay the bills, you need dependable power, superior fuel economy, and a responsive pedal. Build a tune that fits your needs and gets your work truck performing better than ever.

LIGHT-DUTY DIESEL SUPPORT

Take your prized truck to the next level with performance that stands out. Whether you're towing your boat or powersports toys, taking the family on a road trip, or wanting to elevate your everyday driving, achieve your power and fuel economy goals so you can work hard and play hard.
