

TRACK ADDICT

This phone-based app turns your smartphone into a powerful motorsports telemetry and video system using its onboard camera and GPS, or another GPS tool. TrackAddict is compatible with HP Tuners OBDII interfaces so you can record additional vehicle data on the track, like engine RPM, throttle position, temperatures,

and more. Instantly see your lap times, capture video and telemetry data, analyze your lap data, and impress your fans with video and data overlays. With over 1,000 supported tracks available and the ability to build your own, you can capture all your upcoming track days!

TECHNICAL SPECIFICATIONS AND REQUIREMENTS:

- Built for Road Course, Autocross, Rally, Drift, 4x4,
- Race Timing + Data Logging + Analysis + Video.
- Drag Racing and more.
- Works Almost Anywhere! 1000+ Predefined Circuits or Add Your Own.
- Integrated GPS Lap Timer & Display with Predictive Timing (Circuit mode).
- Sector Split Timing & Theoretical Lap Time (Circuit mode).
- High-Definition Video Recording + Data Overlay.
- Lap, GPS, G-Force, and OBD-II Data logging.
- Driving Line Analysis, Statistics, Data Graphs, and Run/Lap Comparison.
- Optional Live Telemetry Streaming via Live.RaceRender.com (requires upgrade).
- Also Supports External GPS and OBDII Devices.
- OBDII Live Monitor, Code Scanning/Reset, and Data Logging.
- Easily exports Data and Video to RaceRender.

The free edition provides features at no cost but is limited to storing three recordings and does not include live telemetry. Upgrading to the pro edition removes those limitations and gives you every feature currently available from this app.

RACE RENDER

After the track, easily transfer your track footage from TrackAddict, or any other source, and create engaging videos in RaceRender with high-tech data overlays for GPS, OBDII, and more. Make it your own with customizable layouts, data visualizations, and even your own logo graphics!

YOUR VIDEO & YOUR DATA

Use the cameras and data equipment you already have! RaceRender works with GoPro, 360fly, Sony ActionCam, Garmin VIRB, and many others. Plus, you can visualize data from a huge selection of GPS devices, data loggers, and apps.

YOUR SPORTS

Create telemetry data overlays for your auto racing, autocross, rally/rallycross, drag racing, drifting, gymkhana, motocross, aviation, sailing, cycling, mountain biking/MTB, running, and other activities! RaceRender works for any track or course but includes additional features for road course racing and track days.

MORE ACTION, MULTIPLE CAMERAS

Show off the action from multiple camera angles with picture-in-picture video and camera switching, or show it all with 360° panoramic video! Take quality to the next level with 4K Ultra High Definition. RaceRender is compatible with many popular cameras and video file formats. It supports multiple cameras with picture-in-picture, split-screen, and camera-switching capabilities, as well as 360° video!
